Accelerated Controlled Entry (A.C.E.) Instructor Development Explosive Entry & Breaching Course Feb 27th – Mar 2nd, 2012

This is one of **the most cost effective** Explosive Entry & Breaching Certification Programs in the nation! When your Tactical Team's mission requires speed, as well as safety, this course provides the '**ACE**' in the hole. It combines the highest levels of risk management, combined with the proven tactical efficiency of relatively low yield directional explosives. This is an important course for all departments and agencies that are placed in tactical/combat situations requiring field expedient breaching methods or have the need to make dynamic controlled explosive entries. This course offers full User Certification in breaching charges for controlled expansion through doors using **Accelerated Controlled Entry Tactical Breaching Devices**. This course reduces liability, increases your Tactical Team options, and uses safe field expedient breaching materials. At the completion of this course students will have the ability to deploy A.C.E. tactical breaching devices, conduct the safest and most practicable methods of dynamic penetration into fortified, or otherwise secured, premises. This program is hands on; all Students will detonate various '*Live*' devices. **The A.C.E. Program and A.C.E. follow-on breaching devices are the most cost effective program & devices available on the market.** Student instructors will also peer teach material back and learn Lesson Plan Development, Instructor Development Skills, Leadership, and very important Team Communication Skills.

Student Instructors will learn how they can have a highly effective Explosive Entry & Breaching program at a much lower cost than imaged so that when the need arrives and they need to protect their community's citizens from harm they have this option available to rapidly gain entry into a location that demands it.

Course Topics include:

- Students will handle pre-manufactured explosive devices & various types of *blasting caps*
- Students assemble, and deploy low and high output *Armadillo* entry charges.
- How to evaluate various material resistance's
- Critical Incident preparation for dynamic entry procedures.
- Tactical placement and deployment of entry charges.
- Deployment of low and high yield "*Armadillo*" and "*Scimitar*" devices.
- Shield progression Team entry. Immediate Team Entry room clearances, hostile searches, and subsequent Hostage Rescue scenarios.
