## Center Axis Relock (C.A.R.) Instructor Development Mar 5<sup>th</sup> 9<sup>th</sup>, 2012 5 Day Firearms Instructor Certification Course

This is an essential Firearms Instructor Course for all department and agency firearms instructors who carry a firearm in their normal course of duty and teach others. At the completion of this course student firearms instructors will have the ability to deploy close combat skills with a firearm in and outside of vehicles, buildings, and display a high level of combat accuracy with a 100% round accountability and a weapon retention system that is unmatched. Student Firearms Instructors also acquire leadership and instructional guidance on how to develop their own lesson plans to best meet the needs of their end user students once they return to their departments or agencies. This is a rare and unique opportunity as an open enrollment course.

This firearms system; Center Axis Relock, (C.A.R.) as developed by Paul Castle is now being quietly adopted and used by some of our nation's most elite operators and other military units worldwide. The C.A.R. firearms system uses open eyed vision application, sight and target acquisition with *both eyes open every time; all the time*. The C.A.R. system is not a stance or a position but a firearms fighting system taught to those who want to survive a close combat encounter. The C.A.R. system will give firearms instructors some new ways to solve some problem areas and issues with individuals who struggle to qualify. The C.A.R. system will likely improve officer accuracy well above the FBI's national statistics for Officer Involved Shootings.

Currently, the C.A.R. program is recognized as the platform used in the very popular video game *Splinter Cell* now out on the market.

### Course Topics include:

- The fundamentals of the Center Axis Relock C.A.R. system
- Stability Through Readiness (The 6 R's)
- C.A.R. Combat Matrix - FULL HAND FIGHTING
- Using your firearm as an impact weapon
