Pressure Point Control Tactics (PPCT) Instructor's Certification Course Feb 27th – Mar 2nd, 2012 (40 hrs - 5 days)

PPCT has a long standing reputation worldwide for what it has brought to self defense and officer survival. PPCT is backed by extensive research and was developed specifically to what a Defense Tactics program is all about. Because of this, it is a corner stone to any Defense Tactics program and an agency with Certified PPCT Instructors within its ranks is investing in reduced injuries to officers and citizens alike.

Course Description:

The PPCT Pressure Point Control Tactics course was the first subject control system designed based on tactical, legal and medical research. It was originally developed as a supplement to existing defensive tactics or impact weapon systems. The course focuses on two primary areas: controlling low-level resistance with finger tip touch pressure to nerve pressure points and controlling high-level resistance with defensive counter strikes and the baton, which produce motor dysfunctions and controlled stuns.

Who should Attend -

Defensive Tactics Instructors and those slotted as new Defensive Tactics Instructors. Those who desire to become Defense Tactics Instructors. Students should be physically fit and able to handle a full week of hands on participation in defense tactics. Student Instructors should have familiarity with PPCT or have attended other Defense Tactics user courses prior to this one.

Pressure Point Control Tactics (PPCT) Instructor's Certification Course

Course Goals:

1. To examine survival learning research in an effort to enhance survivability in combat.
2. To identify the primary and secondary striking targets and their medical implications.
3. To identify the PPCT Fluid Shock Wave Principle, a system of striking that enhances subject control.
5. To teach the recommended PPCT methods of de-escalation.
6. To refine student technique to the instructor level.
7. To teach instructional methods designed to enhance a student's ability to learn survival techniques, increase his/her confidence level, and assist in the successful application of physical techniques.
